

User Story 6: Access Edit Profile

As a user, I want to find and click an "Edit Profile" button or link within my account profile so that I can modify my profile picture.

UAT

Given I am logged in as a user, when I navigate to my profile page and click on the "Edit Profile" button, then I should be taken to a screen where I can view and update my profile pictures.

User Story 7: Upload Profile Picture

As a user, I want to see an option to upload a profile picture on the edit profile screen so that I can personalize my profile visually.

UAT

Given I am on the edit profile screen, when I locate and interact with the profile picture upload functionality and I successfully select and upload an image file, then my profile should display the newly uploaded image.

User Story 8: Access User Settings

As a user, I want to be able to navigate to the user settings section after logging in, so that I can manage my account preferences and personalize my experience.

UAT

Given I am logged in to the application, when I locate and click on the "Settings" or "User Settings" option (or a similarly labeled link or icon), then I should be directed to the user settings page, where I can view and modify my account settings.

User Story 9: Change Username

As a user, I want to be able to modify my name within the user settings, so that I can update it if it is incorrect or if I want to change it.

UAT

Given I am on the user settings page, when I locate the name field, and I enter a new name and save the changes, then my profile should reflect the updated name.

User Story 10: View List of Users (Admin)

As an administrator, I want to go to the list of users' page, so that I can see all the users in the system.

UAT

Given I am logged in as an administrator, when I navigate to the "Users" section in the admin panel, then I should see a list of all users in the system.

User Story 11: Filter Users by Freelancer(Admin)

As an administrator, I want to be able to filter the list of users by their role (freelancer or client) on the users list page, so that I can easily manage and view specific user groups.

UAT

Freelancer Test Case:

Given I am on the users list page in the admin panel. When I select "Freelancer" from the role filter. Then the list should only display users with the "Freelancer" role.

User Story 12: Filter Users by Client(Admin)

As an administrator, I want to be able to filter the list of users by their role (freelancer or client) on the users list page, so that I can easily manage and view specific user groups.

UAT

Given I am on the users list page in the admin panel. When I select "Client" from the role filter. Then the list should only display users with the "Client" role.

User Story 13: Search Users by Name or Email (Admin)

As an administrator, I want to be able to search for users by their name or email address on the users list page, so that I can quickly find specific users.

UAT

Search by Name Test Case:

Given I am on the users list page in the admin panel. When I enter a user's full name or partial name in the search field and submit the search. Then the list should only display users whose names match the search query. The search should be case-insensitive.

Search by Email Test Case:

Given I am on the users list page in the admin panel. When I enter a user's full email address or partial email address in the search field and submit the search. Then the list should only display users whose email addresses match the search query. The search should be case-insensitive.
